

Kurds like to swaddle babies tightly keeping the hips together, unable to move. 庫爾德人習慣把初生嬰兒包裹得緊緊的，下肢不能活動。

The proper way to swaddle baby is to allow free movement of the hips. 正確的襁褓方法是容許髖關節自由活動

Kurds babies have very high incidence of hip dislocation which is related to improper way of swaddling. 庫爾德人的嬰兒中，髖關節脫臼的個案很高，這與他們不正確的襁褓嬰孩方法有關。

Baby Hip Project 嬰兒髖關節事工

The project includes education of parents the risks of hip dislocation in babies and proper way of swaddling. 事工的第一步是教育家長嬰兒髖關節脫臼的風險及正確襁褓的方法

All babies are screened for hip instability. 所有初生嬰兒都接受髖關節的檢查
